

Z24 Day Sailer

The Z24 is a 23'8" daysailer with modern interior and exterior lines. This sailboat features a fully molded interior, crafted with GRP laminated to the hull, providing enhanced structural integrity and durability. It is designed as a trailerable daysailer that satisfies the needs of those who love traveling.

Fast, elegant, and safe, the Z24 was designed from the base up to be a great boat to sail with friends and family. It's spacious cockpit and easy handling allows you to sail single handed or with up to 8 people. Its easy-handling features make it suitable for sailors of any experience level. It is suited with a self-tacking jib and a slab reefing mainsail. The self-tacking jib can be upgraded to a furling self tacking jib. The sheets and halyards are all at arms reach of the helmsman, making it the perfect solo sailboat if you wish to.

The boat is suited with a lifting keel giving you a maximum draft of 4 feet 7 inches and a keel-up draft of 1 feet 8 inches. The rudder housing is

made of lightweight epoxy-carbon fiber, as well as the rudder blade which can be partially lifted, fully lifted or removed out of the water. This, combined with a mast which pivots on deck and that can be disassembled rapidly, makes it a great trailerable boat.

The spacious and modern interiors are the perfect combination to rest, shelter during bad weather and even spend the night.

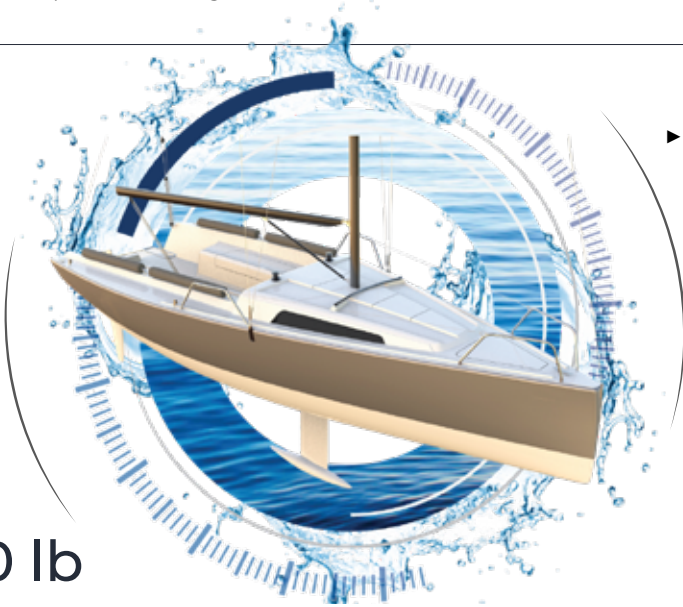

The outstanding features described above confirm that the Z24 exceeds sailors expectations within the 24-foot segment.

For those who enjoy fast cruising and quick sailing reactions, the Z24 can be upgraded into a Performance version. Thanks to the tallest mast the Sail Area/Displacement ratio increases resulting in an exciting sailing experience.

TECH SPECS

- ▶ LOA 23'8"
- ▶ Beam 8'9"
- ▶ Ballast 1100 lb

- ▶ Lifting keel 1,8' / 4'7"
- ▶ Sail area 220 sqft
